

SUMMER CAMP 2026

REAL WORLD READY

AGES 10-14

STUDIO
HOTEL

WEEK	BUILD & ENGINEER 9:30AM - 11:45AM	CODE & CREATE 11:45AM - 2:00PM
<u>Week 2</u> Jul 13 - Jul 17	 Entrepreneurship with AI Students build a real business across five days; branding, sales, operations, finance, and HR using AI at every step. On Day 3 they laser-cut a physical product prototype. Friday is a live Shark Tank pitch.	 Electronics Product Build Students design and build a physical product prototype using the laser cutter and electronics. The brief is open sensor-driven device, motorised model, or smart circuit. The prototype goes on the table at the Friday pitch.
<u>Week 3</u> Jul 20 - Jul 24	 EV3 Robotics Students build five different EV3 robots across the week; line followers, maze navigators, robotic arms, and sumo bots. Each day is a new standalone build and challenge. The week ends with a live paddlebot race.	 Electronics Engineering Students build five real electronic systems; a cable car, solar tracker, irrigation model, wind turbine, and water wheel. Each project connects a motor or sensor to a working circuit.

Camp timings: 9:30am to 2pm
Drop-off timings: 8:30am
onwards
